WORKSHOP: SENSORS IN AN IOT ENVIRONMENT AT STARTUPNIGHT BERLIN 2019

Join our workshop and discover state-of-the-art sensor solutions from industry-leading sensor suppliers during Startupnight 2019 in Berlin.

The first discussions about IoT are usually focused on the transmission protocols necessary to connect IoT nodes to a gateway or cloud. In the second step, it will become more and more important to bring sensor data securely to a gateway or into the cloud and also to figure out which sensors are the best sensors to use in an IoT environment.

We as Avnet Silica offer a broad portfolio of IoT ready sensors and secure elements to bring the data of these sensors securely into the cloud. During our workshop session at Startupnight, we will introduce you to solutions from our trusted supplier partners.

Get your ticket now and join our workshop and Startupnight!

Agenda

- **12:30 - 13:00** Welcome and Registration
- **13:00 - 13:15** Overview Avnet Silica
- **13:15 - 14:00** Brainium-SmartEdge Agile – Secure Sensor platform
- **14:00 - 14:45** Sensors and security devices in IoT applications
- **14:45 - 15:00** Coffee Break
- **15:00 - 15:30** A fully portfolio on sensor device
- **15:30 - 16:00** Touch & Gesture sensors
- **16:00 - 16:30** Battery-Free Wireless Sensor and other for IoT
- **16:30 - 17:00** nRF9160 Thingy- Sensor data into the cloud by using NB-IoT/LTE CATM1

DATE & VENUE

September 6, 2019 – Berlin

Deutsche Telekom AG

Berlin Representative Office

Französische Straße 33 a-c

10117 Berlin
